Liudmila Sergeeva (she/her)   Frontend Web Developer

Address:	0468 Oslo, Norway	E-mail:	sergeeva.mila.web@gmail.com
Birth date:	19.05.1985	LinkedIn:	www.linkedin.com/in/liudmila-sergeeva
		GitHub:	https://github.com/MilaSergeeva

SUMMARY

Adaptable web developer with practical experience in creating websites and web applications using React, Redux, JavaScript, TypeScript, Node.js and WordPress. Skilled in UX/UI design, experienced in using Figma for design and prototyping. I also have experience in creating graphic assets like logos, icons, and website imagery. Passionate about continuous learning and delivering user-focused solutions.

WORK EXPERIENCE

2024.02 - 2025.01   Diversify   Digital Delivery Manager

Handle the entire spectrum of web presence activities for diverse projects, encompassing the inception, design, development, and ongoing maintenance phases. Work closely with content creators, marketers, and stakeholders, I ensured our web solutions aligned with organizational goals.

2021.09 - 2024.02   Diversify   Web developer/ UX UI designer

I worked across all phases of web projects, including inception, design, development, and maintenance, managing a portfolio of eight websites. These ranged from simple content platforms to advanced mentoring portals for enhancing members' educational experiences. Collaborating with content creators, marketers, and stakeholders, I ensured our web solutions aligned with organizational goals.

Stack of technologies I work with includes:

- WordPress CMS
- HTML, CSS, SASS
- JavaScript
- Ruby on Rails
- DigitalOcean
- Figma
- Git, Visual Studio Code, Trello

Results:

- Successfully managed and expanded the online presence for Difersify;
- Created 6 websites on WordPress for diverse businesses/projects, including branding and functionality;
- Maintained 9 websites;
- Produced visually engaging designs that enhanced brand identity and user experience across various digital platforms; created logos and SoMe/Printing materials for various projects;
- Expanded the functionality of the mentorship platform using Ruby on Rails,JavaScript, HTML, Sass. Adapted design and accessibility.

2021.04 - 2021.09   Diversify   IT Intern

Updated and maintained two current websites on the WordPress CMS.
Designed and developed the prototype of the mentorship platform.

2020 — 2021   Self-Employed/ Freelance   Frontend Web Developer

Contributed to improving the frontend of live web applications using React and Redux, focusing on enhancing functionality and user experience. Worked closely with the team to troubleshoot issues and implement updates aligned with project requirements.

2020- 2021/ 2023   Yandex.Praktikum   Student

I have been studying at Yandex.Praktikum for 14 months. Several projects were created during this course of studies. During the course, I participated in a live-production project under a NDA, where my role involved frontend development (eranslating the design from the Figma prototype to the website layout, and development of functionality as required in the technical specifications).

Focus of course: React; Redux; SPA; State management and UX; Routing and Authorisation; TypeScript; WebSocket; Responsive layout and animation; Node.js; Express.js; MongoDB; Jest and Cypress; security in web applications.

Projects developed: <u>Stellar Burger</u> (the degree final project)

Built a full-stack React/Redux/TypeScript application that allows users to create an account in a space-themed burger place. Users can place orders, view the order feed, and track completed orders. The app includes identification, authentication, and authorization features, implemented with client-side and user-side validation using Joi/Celebrate modules and JWT tokens.

<u>News Explorer</u> (the degree final project)
Built a full-stack React application that allows users to find and save news. It is possible to sign-up and save news in user profile. Implemented user authentication and authorization with JWT tokens. Ensured seamless client- and server-side validation for enhanced security. Local Storage.

<u>Turbina</u>
Collaborated with a team to create a single page application with audio-player for NDA using HTML, CSS, Javascript, Express and Node.js

<u>Mesto</u>
Built a full-stack single-page application allowing users to upload, view, and manage photos. Achieved high performance with optimized backend logic using Node.js and Express.

2015 — 2020

I have moved to Norway. After that I started to study Norwegian/ passed Norskprøven exam participated in a few NAV educational programs. I studied 3D modelling and programming on my own.

2010 — 2015

Saint-Petersburg Center of Excellence EMC   Accountant

Business Unit's forecasting and planning processes. Analyze and interpret monthly variances, trends and discrepancies between plan, actual and prior forecast in developing projections. Responsible for presenting COE's actual vs forecast expenses review to the US Finance department on a monthly basis.

EDUCATION

2006 — 2010

Master's degree in Psychology
Saint-Petersburg State Institute of Psychology and Social Work

2002 — 2007

Master's degree in Economics/Management (graduated with honor)
Saint-Petersburg State University of Service & Economy
