SUMMARY

In the first part of my career I worked in finance and now I want to develop myself in the field of web as a Frontend Developer. Starting in a new country motivated me to develop new skills. I made a research of Norwegian job market and saw that there is high demand for developers here. That and the fact I alway were good in technologies made me even more motivated. I became interested in becoming a developer. I spent 1 year studying and developing my knowledge in this area. I want to find a place where I can grow as a specialist and be a valuable addition to the company.

I characterize myself as a pro-active and organised person. I enjoy being part of a team as much as working independently with focus on details. I have a good sense of urgency and problem-solving skills.

WORK EXPERIENCE

2020 — now

Yandex.Praktikum   **Student**

I have been studying at Yandex.Praktikum for 7 months. Several projects were created during this course of studies (to see follow the GitHub link: https://github.com/MilaSergeeva). Also I participated in some external projects which gave me great experience of working in a team and a lot of new skills. Throughout the training we were mentored by highly skilled developers. Their feedback was extremely valuable to me. In projects I used HTML, CSS, JavaScript, Express.js, Reakt and Node.js

Projects:

Turbina

Collaborated with a team to create a single page application with audio-player using HTML, CSS, Javascript, Express and Node.js

Link to Repo: https://github.com/MilaSergeeva/turbina-dd

Mesto

Created a full-stack single page application to allow users to upload, view, like and delete photos using HTML, CSS, Javascript, Express and Node.js

Link to Repo: https://github.com/MilaSergeeva/mesto-react

How to learn

Created a single page web site with tips on how to learn. Used HTML, CSS

Link to Repo: https://github.com/MilaSergeeva/how-to-learn

Russian travel

Created a single page web site with useful information about how to travel through Russia. Used HTML, CSS

Link to Repo: https://github.com/MilaSergeeva/russian-travel

2015 — 2020

I have moved to Norway due to the family reasons. After that I started to study Norwegian/passed Norskprøven exam. In 2016 I became mother. I participated in a few NAV educational programs. I have also studied 3D modelling and programming on my own.

2010 — 2015   **Saint-Petersburg Center of Excellence EMC**   **Accountant**

Business Unit's forecasting and planning processes. Analyze and interpret monthly variances, trends and discrepancies between plan, actual and prior forecast in developing projections. Responsible for presenting COE's actual vs forecast expenses review to the US Finance department on a monthly basis. Track and review COE's gross and net actual/forecast. Monthly Cash Flow Reporting. Preparing general journal entries, reconciling accounts, posting month-end entries in SAP. Researched and implemented a system for electronic documentation and signature to adhere to Currency Control regulations, overall support. Enjoyed participating in team/company side activities.

2007 — 2010   **Sole proprietor Grigor'ev (Jewelry Company)**   **Accountant**

Began as an accountant, later I took additional responsibilities as a sales manager. Was responsible for income and expense tracking, tax reporting. Participation in exhibitions. Cultivate new customers and opportunities.

2002 — 2007   **State S.-Pb. University of Service & Economy**   **Secretary
of sub-faculty**

Allocate available resources to enable successful task performance, design and implement filing systems, office policies and procedures. Analyze and monitor internal processes, prepare operational reports and schedules to ensure efficiency, co- ordinate schedules, appointments.

EDUCATION

2006 — 2010   **Master's degree in Psychology**
Saint-Petersburg State Institute of Psychology and Social Work
